

KAESER高壓系統流程圖

Compressed air system with booster up 45 bar

特點 Characteristics :

- 提供穩定多元壓力需求，如高壓10bar~45bar，低壓 7~10bar。

providing the stable and multiple pressure requirements, such as high-pressure 10 ~ 45 Bar, Low 7 ~ 10bar.

- 低壓空氣由螺旋式空壓機產出再冷卻，可獲得高效率運轉模式。

Low-pressure air was be produced from the screw compressor, and then cooled to obtain high efficiency operation mode.

- 提供高品質空氣(ISO8573 CLASS1,4,1)。

Providing high-quality air(ISO8573 CLASS1,4,1)

- 不需要額外水冷卻系統。

No additional water cooling system.
